

THIS LETTER IS FOR

## Isuzu D-Max RT50 6th Gen

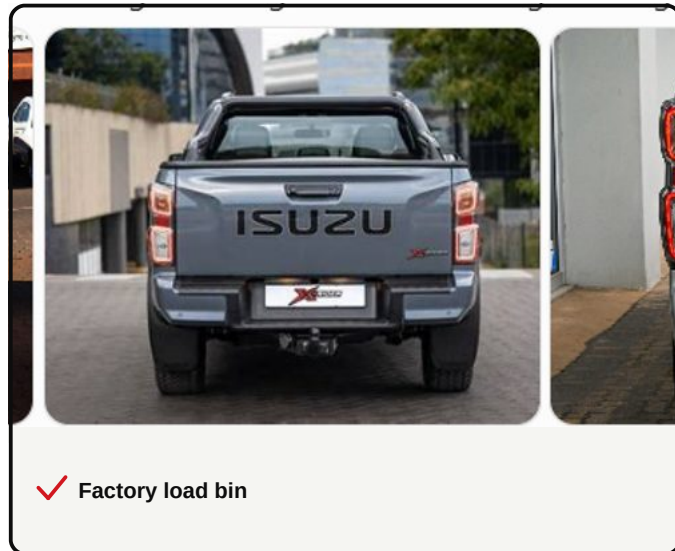

2012-2020 · double cab

WHICH ONE IT IS

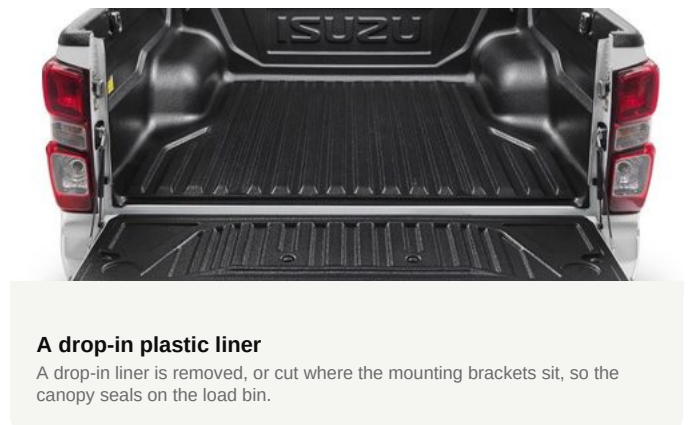

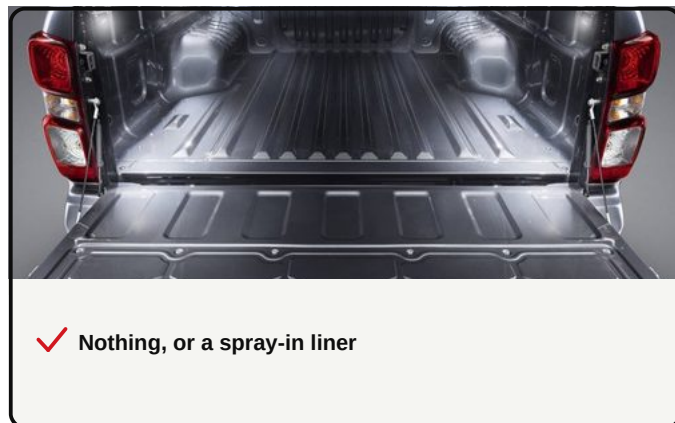

## Is it this bakkie?

The canopy is built to the factory load bin. Check the body first, then what the maker asks of every D-Max RT50 6th Gen.

### 01 Is it a pick-up with the factory load bin, or a cab-chassis with a tray?

### 02 What is in the load bin?

**Not sure?** Send a photograph of the tailgate and the load bin with your reply and we confirm it before the day.

ISUZU D-MAX RT50 6TH GEN · BEFORE THE DAY

# Before it is fitted

## WHAT COMES OFF

✓ A factory styling bar comes off before the canopy goes on.

## ON THE DAY

### Clamped to the load bin

No drilling. The clamps sit on the load bin rail, which is why a liner or a trim in the way matters.

### Sealed on the rail

Pinch weld and a base rubber all the way round. The dust stays outside.

### Off again, clean

Two people and about half an hour. The bakkie is as it was for resale.

## BEFORE THE DAY, WE ASK

### 01

Is it a pick-up with the factory load bin, or a cab-chassis with a tray?

### 02

What is in the load bin?

**Fitting takes about two hours.** Bring the answers above, or send them with your reply, and the bay is ready when you arrive.
